

PHOTOGRAPHY
DAUNTSEY'S SCHOOL

THINGS TO DO:

LOOK AT WORK

LOOK AT WORLD

DAYDREAM

LOOK - at the work of photographers.

Visit a gallery in person if you can. If not, visit a gallery online or browse through the suggested magazine websites. What kind of photography do you like, admire, respect or hate?

LOOK - at good design.

Presenting your work in a sketchbook is an important skill. How do professionals arrange images with text. View the suggested websites for ideas. Watch the video about Gestalt Design principles.

LOOK - at your images.

What images do you make? How do you make them? What are the images which surround you? Do you like them because they are a memory of a place or person? Do you like the way the image is made? Do you like colour? Are you surprised by images? How is light used?

LOOK - at the world around you.

What is the quality of light? strong, harsh, soft, gentle. Does it come from one direction or bounce from all over the place? What is the source? The Sun, a bulb, a candle, a phone torch? What colour is the light? What sort of colour is the light? What sort of shadow is created?

Ask yourself lots and lots and lots of questions - you don't have to have answers.

Then.....

DAYDREAM

Switch off, disconnect be quiet. Let your brain have time and space to think.
